

# A PATH → TO 100% PROTECTED

← November 2017

As of November 21, 2017, 143 municipalities and 3 counties in Mississippi have implemented comprehensive, smoke-free ordinances. These ordinances **protect 34%** of Mississippi.

If every Mississippi municipality passed a comprehensive smoke-free ordinance, **only 55%** of Mississippians would be protected. The rest live in rural areas outside of municipalities.

The only way to protect all Mississippians is to pass a **state-wide comprehensive smoke-free law.**
