

A PATH → TO 100% PROTECTED

← September 2019

As of September 9, 2019, 161 municipalities and 5 counties in Mississippi have implemented comprehensive, smoke-free ordinances. These ordinances **protect 35%** of Mississippi.

If every Mississippi municipality passed a comprehensive smoke-free ordinance, **only 55%** of Mississippians would be protected. The rest live in rural areas outside of municipalities.

The only way to protect all Mississippians is to pass a **state-wide comprehensive smoke-free law.**
