

A PATH → TO 100% PROTECTED

← March 2021

As of March 11, 2021, 174 municipalities and 7 counties in Mississippi have implemented comprehensive, smoke-free ordinances. These ordinances **protect 36%** of Mississippi.

If every Mississippi municipality passed a comprehensive smoke-free ordinance, **only 51%** of Mississippians would be protected. The rest live in rural areas outside of municipalities.

The only way to protect all Mississippians is to pass a **state-wide comprehensive smoke-free law.**
