

n 1998, the state of Mississippi approved a tobacco prevention pilot program that resulted in the formation of The Partnership for a Healthy Mississippi. The Partnership implemented most of its tobacco control programs by 1999, and at the conclusion of the pilot program, approximately \$20 million annually was court-ordered to go directly to

The Partnership from the state's tobacco settlement. In addition to these funds, the Mississippi State Department of Health (MSDH) received funds from the Centers for Disease Control and Prevention through a cooperative agreement to implement and enhance tobacco prevention and cessation efforts.

In 2006, Governor Haley Barbour, the state Division of Medicaid, and the Health Care Trust Fund filed motions to vacate the December 2000 order and direct the \$20 million away from tobacco prevention and into the trust fund. This motion was successful. As of June 1, 2006, counter-marketing campaigns were no longer airing, and the college program for the 18 to 24-year-old market ended. As of November 30, 2006, The Partnership ceased funding of cessation programs, including a statewide quitline and

regional tobacco cessation treatment clinics, a law enforcement program, and numerous statewide and afterschool programs.

In 2007, the Mississippi Legislature called for the development, implementation, and funding of a comprehensive and statewide tobacco education, prevention, and cessation program that is consistent with the Best Practices for Tobacco Control Programs of the federal Centers for Disease Control and Prevention. The FY2008 allocated \$8 million for the Office of Tobacco Control, MSDH, to create a state tobacco prevention and cessation program. Funding at this level was sustained for FY2009, FY2010, FY2011, FY2012, FY2013, FY2014, and FY2015.

{cigarettes}

- * Tobacco use among Mississippi youth has decreased substantially since statewide tobacco control programs were implemented in 1999.
- * Current smoking among public middle school students has decreased by 85% since 1998, leading to 19,724 fewer young smokers.
- * Current smoking among public high school students has decreased by 67% since 1998, leading to 27,834 fewer young smokers.
- * The prevalence of having ever tried smoking has decreased by 72% since 1998, leading to 44,044 fewer middle school students who have tried smoking.
- * The prevalence of having ever tried smoking has decreased by 53% since 1998, leading to 54,303 fewer high school students who have tried smoking.
- * Frequent smoking has decreased by 94% since 1998, leading to 5,491 fewer middle school students who are frequent smokers.
- * Frequent smoking has decreased by 80% since 1998, leading to 15,554 fewer high school students who are frequent smokers.

{smokeless tobacco}

- * Current smokeless tobacco (SLT) use among public middle school students has decreased by 63% since 1998, leading to 6,724 fewer young SLT users.
- * The prevalence of having ever tried SLT has decreased by 53% since 1998, leading to 10,647 fewer middle school students who have tried SLT.
- * The prevalence of having ever tried SLT has decreased by 38% since 1998, leading to 13,644 fewer high school students who have tried SLT.

{cigars}

- * Current cigar smoking among public middle school students has decreased by 82% since 1998, leading to 15,130 fewer young cigar smokers.
- * Current cigar smoking among public high school students has decreased by 61% since 1998, leading to 18,556 fewer young cigar smokers.

- * The prevalence of having ever tried cigar smoking has decreased by 74% since 1998, leading to 26,785 fewer middle school students who have tried cigar smoking.
- * The prevalence of having ever tried cigar smoking has decreased by 59% since 1998, leading to 42,296 fewer high school students who have tried cigar smoking.

key demographic differences

Among middle school students, there are no significant differences in the percentage of males and females or Caucasians and African-Americans who have ever or who currently smoke cigarettes.

> High school Caucasians are more likely to be current smokers or to be frequent smokers than African-Americans.

Among high school students, there are no significant differences in the percentage of males and females who frequently smoke cigarettes.

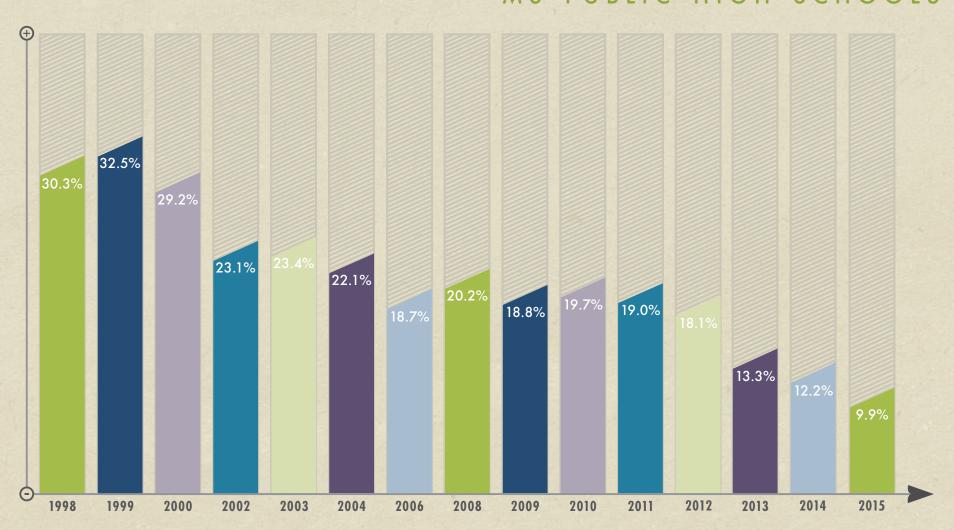

{cigarettes}

High school Caucasians are more likely to have ever tried cigarette smoking than African-Americans.

8th graders are more likely to be ever or current smokers than 6th graders.

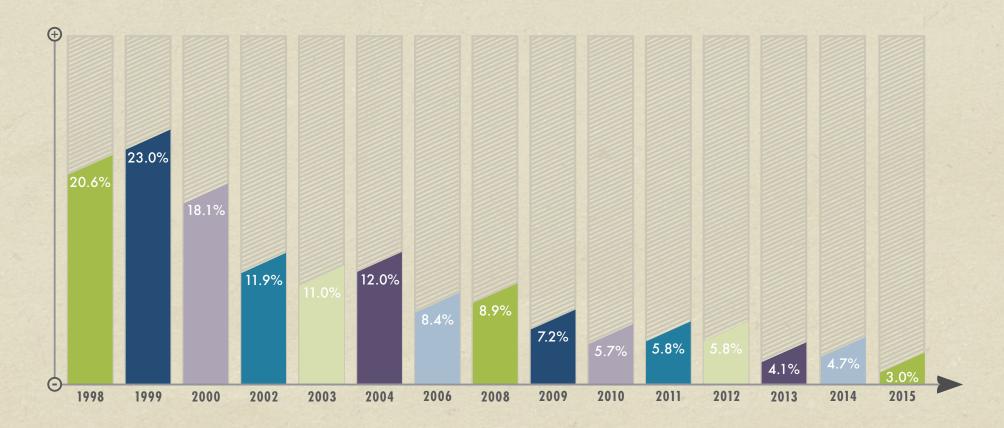

High school males are more likely to have ever or currently smoke cigarettes than females.

current cigarette smoking MS PUBLIC HIGH SCHOOLS

- In 2015, 13,508 Mississippi public high school students were current smokers.
- * The prevalence of current smoking has decreased by 67% since 1998, leading to 27,834 fewer young smokers.
- In the past year, the prevalence of current smoking has not changed significantly.

current cigarette smoking MS PUBLIC MIDDLE SCHOOLS

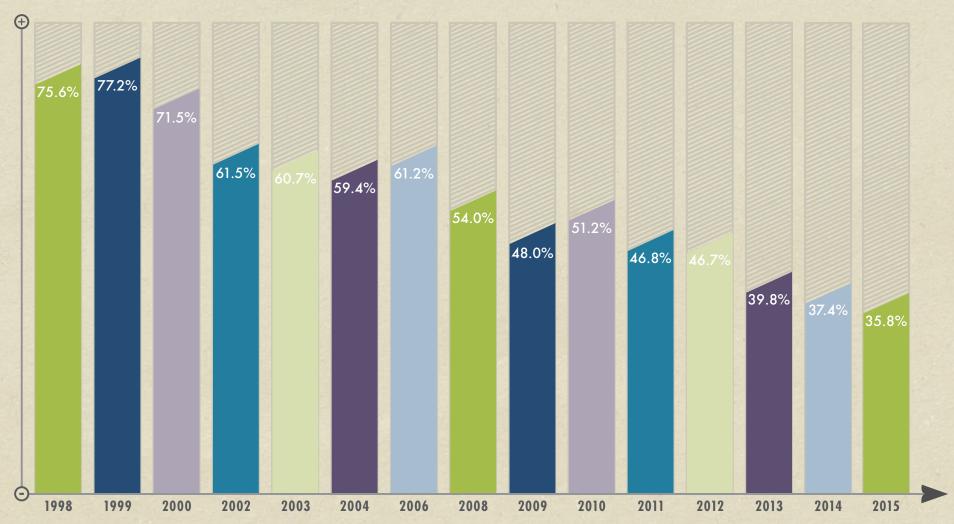

- * In 2015, 3,362 Mississippi public middle school students were current smokers.
- * The prevalence of current smoking has decreased by 85% since 1998, leading to 19,724 fewer young smokers.
- * In the past year, the prevalence of current smoking has not changed significantly.

ever tried a cigarette

MS PUBLIC HIGH SCHOOLS

- * In 2015, 48,846 Mississippi public high school students had tried at least one cigarette.
- * The prevalence of having ever tried a cigarette has decreased by 53% since 1998, leading to 54,303 fewer high school students who have tried smoking.
- * In the past year, the prevalence of having ever tried smoking has not changed significantly.

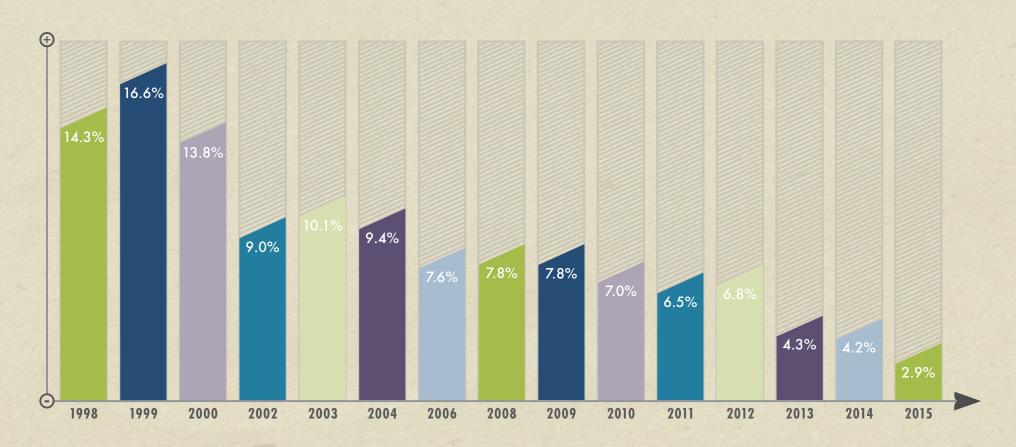

ever tried a cigarette MS PUBLIC MIDDLE SCHOOLS

- * In 2015, 16,811 Mississippi public middle school students had tried at least one cigarette.
- * The prevalence of having ever tried a cigarette has decreased by 72% since 1998, leading to 44,044 fewer middle school students who have tried smoking.
- * In the past year, the prevalence of having ever tried smoking has not changed significantly.

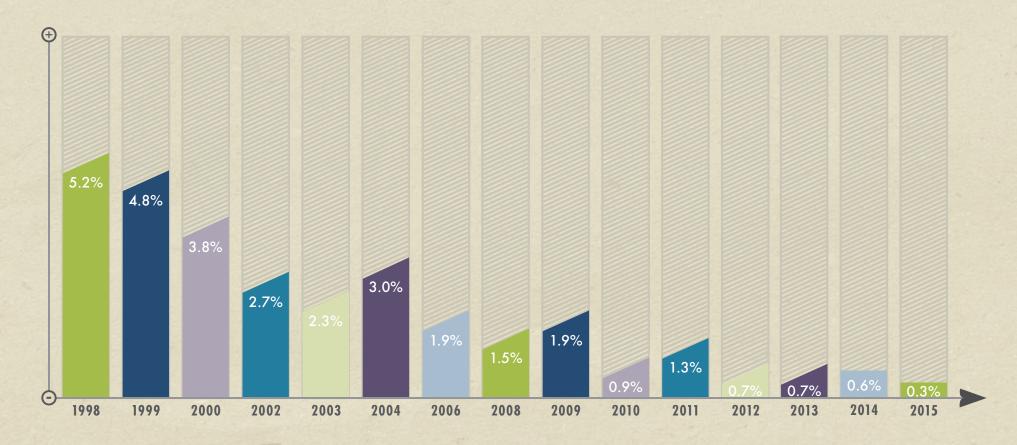

frequent cigarette smoking MS PUBLIC HIGH SCHOOLS

- * In 2015, 3,957 Mississippi public high school students had smoked cigarettes on at least 20 of the past 30 days.
- * The prevalence of frequent smoking has decreased by 80% since 1998, leading to 15,554 fewer high school students who are frequent smokers.
- * In the past year, the prevalence of frequent smoking has not changed significantly.

frequent cigarette smoking MS PUBLIC MIDDLE SCHOOLS

- * In 2015, 336 Mississippi public middle school students had smoked cigarettes on at least 20 of the past 30 days.
- * The prevalence of frequent smoking has decreased by 94% since 1998, leading to 5,491 fewer middle school students who are frequent smokers.
- * In the past year, the prevalence of frequent smoking has not changed significantly.

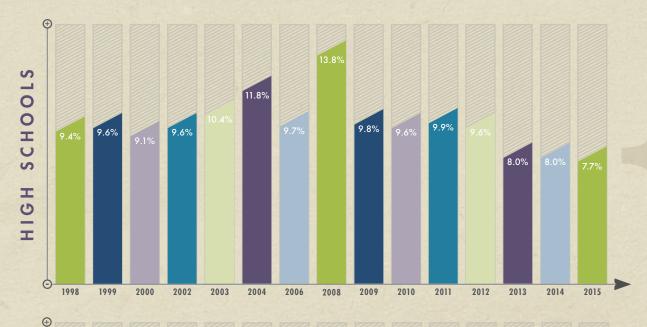

Middle school males and Caucasians are more likely to have ever used or to currently use smokeless tobacco than females and African-Americans.

High school males are more likely to have ever, to currently, or to frequently use smokeless tobacco than females.

> High school Caucasians are more likely to have ever been or to currently or frequently be SLT users than African-Americans.

current smokeless tobacco use

MISSISSIPPI PUBLIC SCHOOLS

- In 2015, 10,506 Mississippi public high school students were current SLT users.
- * Since 1998, the prevalence of current SLT use has not changed significantly.
- In the past year, the prevalence of current SLT use has not changed significantly.

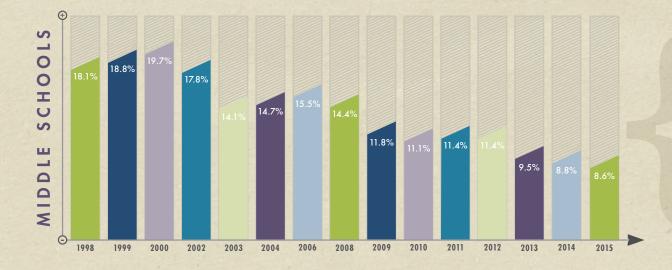

- * In 2015, 4,035 Mississippi public middle school students were current SLT users.
- * The prevalence of current SLT use has decreased by 63% since 1998, leading to 6,724 fewer young SLT users.
- In the past year, the prevalence of current SLT use has not changed significantly.

ever tried smokeless tobacco

MISSISSIPPI PUBLIC SCHOOLS

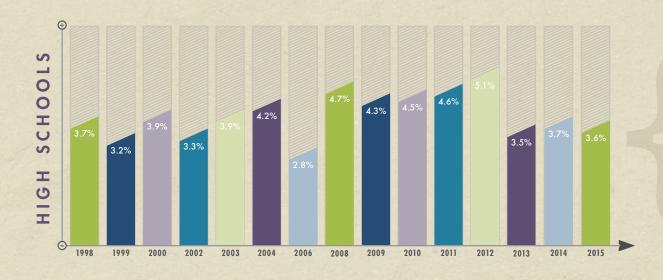

- In 2015, 22,103 Mississippi public high school students had tried SLT.
- * The prevalence of having ever tried SLT has decreased by 38% since 1998, leading to 13,644 fewer high school students who have tried SLT.
- In the past year, the prevalence of having ever tried SLT has not changed significantly.

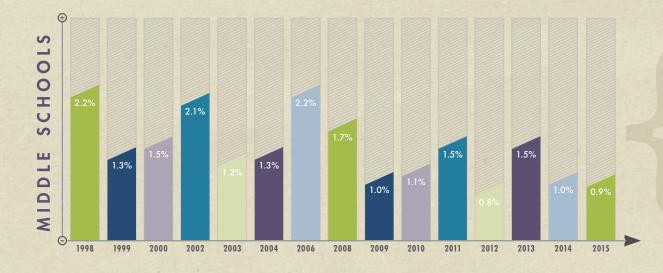

- In 2015, 9,638 Mississippi public middle school students had tried SLT.
- * The prevalence of having ever tried SLT has decreased by 53% since 1998, leading to 10,647 fewer middle school students who have tried SLT.
- In the past year, the prevalence of having ever tried SLT has not changed significantly.

frequent smokeless tobacco use

MISSISSIPPI PUBLIC SCHOOLS

- In 2015, 4,912 Mississippi public high school students had used SLT on at least 20 of the past 30 days.
- * Since 1998, the prevalence of frequent SLT use has not changed significantly.
- In the past year, the prevalence of frequent SLT use has not changed significantly.

- In 2015, 1,009 Mississippi public middle school students had used SLT on at least 20 of the past 30 days.
- * Since 1998, the prevalence of frequent SLT use has not changed significantly.
- In the past year, the prevalence of frequent SLT use has not changed significantly.

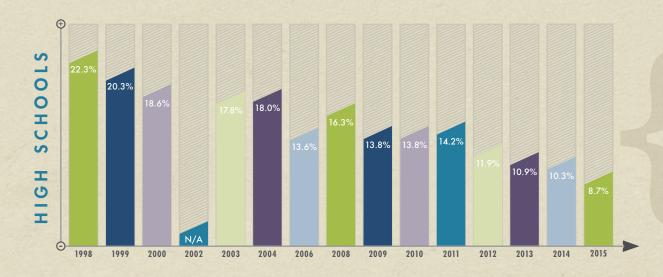

key demographic differences {cigc s}

High school males are more likely to have ever tried or to currently smoke cigars than females.

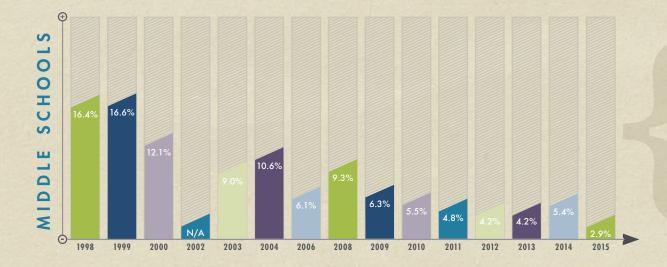

High school Caucasians are more likely to have ever tried cigar smoking than African Americans.

8th graders are more likely to have ever tried cigar smoking than 6th graders.

current cigar smoking MISSISSIPPI PUBLIC SCHOOLS

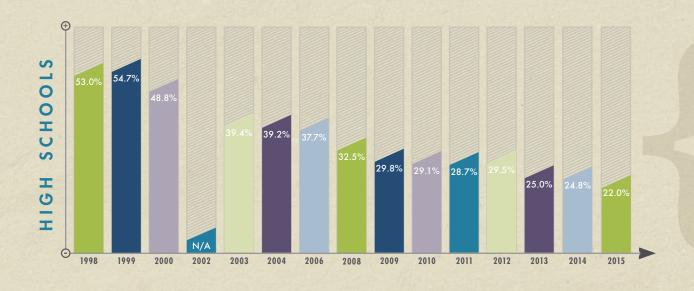

- In 2015, 11,870 Mississippi public high school students were current cigar smokers.
- * The prevalence of current cigar smoking has decreased by 61% since 1998, leading to 18,556 fewer young cigar smokers.
- In the past year, the prevalence of current cigar smoking has not changed significantly.

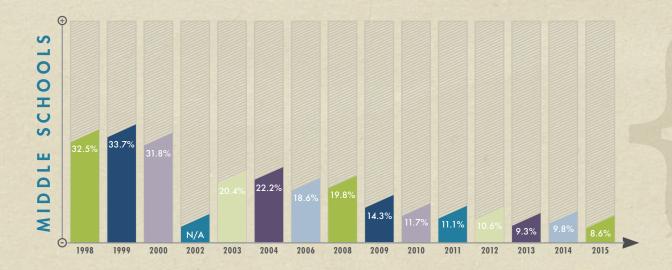

- In 2015, 3,250 Mississippi public middle school students were current cigar smokers.
- * The prevalence of current cigar smoking has decreased by 82% since 1998, leading to 15,130 fewer young cigar smokers.
- In the past year, the prevalence of current cigar smoking has not changed significantly.

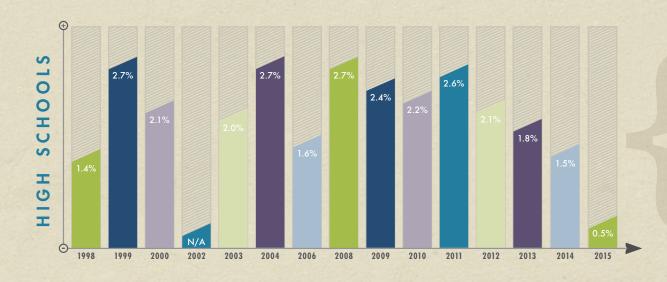

ever tried a cigar MISSISSIPPI PUBLIC SCHOOLS

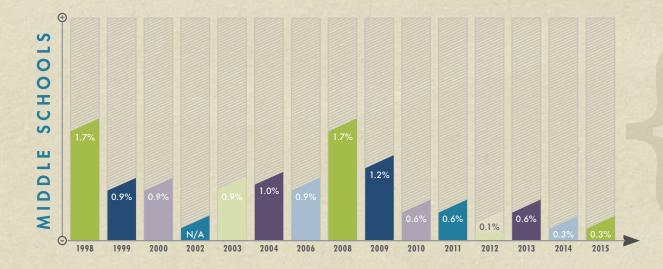

- In 2015, 30,017 Mississippi public high school students had tried at least one cigar.
- * The prevalence of having ever tried a cigar has decreased by 59% since 1998, leading to 42,296 fewer high school students who have tried smoking cigars.
- In the past year, the prevalence of having ever tried smoking cigars has not changed significantly.
- In 2015, 9,638 Mississippi public middle school students had tried at least one cigar.
- * The prevalence of having ever tried a cigar has decreased by 74% since 1998, leading to 26,785 fewer middle school students who have tried cigar smoking.
- In the past year, the prevalence of having ever tried smoking cigars has not changed significantly.

frequent cigar smoking MISSISSIPPI PUBLIC SCHOOLS

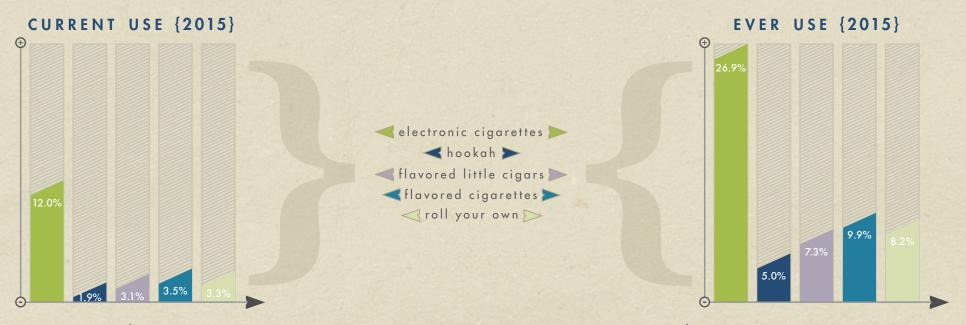

- In 2015, 682 Mississippi public high school students had smoked cigars on at least 20 of the past 30 days.
- * Since 1998, the prevalence of frequent cigar smoking has not changed significantly.
- In the past year, the prevalence of frequent cigar smoking has not changed significantly.

- In 2015, 336 Mississippi public middle school students had smoked cigars on at least 20 of the past 30 days.
- * Since 1998, the prevalence of frequent cigar smoking has not changed significantly.
- In the past year, the prevalence of frequent cigar smoking has not changed significantly.

BACKGROUND

The Centers for Disease Control and Prevention's (CDC) Office on Smoking and Health (OSH) provides technical assistance to the states to administer this survey. Mississippi has administered the Youth Tobacco Survey (YTS) in 1998, 1999, 2000, 2002, 2003, 2004, 2006, 2008, 2009, 2010, 2011, 2012, 2013, 2014, and 2015.

THE PURPOSE OF THE YTS is to provide states with the data needed to design, implement, and evaluate comprehensive tobacco control programs that work to prevent young people from beginning tobacco use and help those who have already started using tobacco to quit.

THE YTS COLLECTS DATA from students in grades 6 through 12.

YTS DATA provide information on many key intermediate and long-term tobaccorelated indicators, allowing states to measure progress toward state goals and objectives.

SAMPLE DESIGN

A multi-stage sample design was applied with public middle and high schools selected proportional to enrollment size. Classrooms were chosen randomly within selected schools, and all students in selected classes were eligible for participation. Data were collected by means of an anonymous and confidential self-administered questionnaire. The questionnaires were group-administered in classrooms during a normal class period by teachers following standardized procedures.

EDITING, WEIGHTING, AND INITIAL ANALYSIS OF DATA

The Research Triangle Institute and the CDC's Office of Smoking and Health provided technical assistance with the processing and weighting of the data. A weighting factor was applied to each student record to adjust for non-response at the school, class, and student levels. SUDAAN statistical software was used to calculate standard errors for estimates and 95 percent confidence intervals. Weight adjustments were made for the following:

WEIGHT = W1 * W2 * f1 * f2 * f3 * f4

W1 = inverse of the probability of selecting the school W2 = inverse of the probability of selecting the classroom within the school

F1 = a school-level non-response adjustment factor calculated by school size (small, medium, large) F2 = a class adjustment factor calculated by school F3 = a student-level non-response adjustment factor

calculated by class F4 = a post stratification adjustment factor calculated by gender and grade
